

Supporting your stems without the use of oasis/floral foam.

Holly Chappell pillows come in four sizes: 4", 6", 8" and 10". Pictured here are 4, 6 and 10....we have 6" and 8" in the GC Shop. They are made of heavy plastic, dark green, and come in two parts that clip together to form a domed "pillow".

An alternative way to support your stems without oasis is to do a grid of floral tape across your vase top, and secure it with another piece all the way around the outer edge, trimming off any excess.

We have taken a traditional vase in the shape of an urn.

Stems of assorted greenery have been inserted through both supports in a Holly Chappell pillow at various angles, the vase has been filled with water and with the weight of the foliage, the 6 inch pillow fits perfectly on the top of the vase and voila, we have a lovely mixed green foliage arrangement!
